Magnetic mounting pad, Model 208

Main Characteristics

- portable route measurements
- impoved frequency response when used with our magnet model 210, 211, ..
- Useful for machine without magnetic surface
- Stainless steel

Description

The use of magnetic mounting pad ensures consistent measurement location for accurate trending. It also greatly improves the frequency response when used with our magnet model 210, 211, ... Magnetic mounting pads / magnet targets are the only way to use flat or curved magnet when the machine to be monitored has no magnetic surface. Our pads feature an abraded adhesive mounting surface for superior bonding.

Ordering information

To order, specify part number, options and suffix :

208.01- BB

BB : Diameter

25 - 25 mm

Ordering example

208.01-25 Magnetic mounting pad, dia 25

Stocked models :

208.01-25

Specifications

Environmental

Temperature ..... depends on adhesive

Physical

Dimensions ..... See outline drawing Fig 1a
Weight ..... 22 gr (0.78 Oz)
Material ..... Stainless steel

Accessories

Magnet ..... model 21X, 22X
Adhesive ..... Loctite 330
